4. Create a New Colour Swatch and name it '**Scodix**' or '**Spot UV**'.
5. Select colour type '**Spot Colour**', and convert all Scodix or Spot UV Artwork to this new spot colour. Ensure fill and opacity are set to 100%.

6. Go into the Separation Preview palette (Window / Output / Separation Preview). Change to View: Separations and view only the Scodix or Spot UV colour to ensure your spot colour has been applied.

7. Save as '**Press Ready**' PDF
The final press ready artwork should be set up as a PDF.
Use **The Print company export setting (preset available for download on our website) or 'High Quality Print'** setting and ensure to include trims and bleed.
Multiple kinds/names will require to be saved as one PDF per kind/name.

If you have any questions, need any help to prepare these or if you would like us to set your files up ready for printing with Scodix, please get in touch and we would be happy to assist.
